

Empowering Grid Reliability through Innovative Solutions

About Splice N Connect

Our mission is to provide cutting-edge solutions to enhance reliability, visibility, and efficiency in power grid operations. Splice N Connect is developing continuous monitoring of underground power cables to empower industries with actionable data allowing for enhanced power system optimization.

Why Splice N Connect?

- ✓ Increased Power System Optimization
- ✓ Enhanced Grid Reliability & Proactive Maintenance
- ✓ Future Proof against Unplanned Outages
- ✓ Boost Electrical Safety with Asset Insights & Health Information
- ✓ Experienced Electrical & Commercial Professionals

The Challenge

There is a **lack of visibility** into underground power systems and cable health **preventing** grid optimization and reliability.

Our Solution (In Development)

Monitoring of Parameters

Continuous monitoring of critical parameters indicative of asset health and early failure indication.

Continuous Power

Uninterruptible power capabilities to ensure continuous monitoring without interruptions.

Versatile Design

Easy to install and compatible with all enclosure types, including direct-buried, concrete enclosures and underground vaults for distribution system voltages.

Intuitive Data

Easy to use data on a simple graphical interface for system health, status, and failure alerts allowing for proactive maintenance planning.
